A totally recoilless air rifle, the RWS Model 54 Air King uses a "floating action", to achieve its maximum accuracy. When this magnum air rifle is fired, the action slides rearward in the stock, absorbing the recoil, and permitting the pellet to exit the barrel before any of the spring vibration affects its travel.

I must admit, if I could afford a new  
springer right now, it would be the Diana

one of the most lauded air rifle makers  
of all time, and the RWS 54 is one of  
their nicest models available in my  
opinion.
